DETAILED ACTION

1. Claims 7, 9-12, 14-18, and 21 are allowed over the prior art.
2. Claims 1-6 have been withdrawn. It is advised that Applicant cancel the withdrawn claims to place the application in condition for allowance.
3. The prior art of record fails to teach or suggest the claimed invention individually or in combination the limitation of "translating said first set of proprietary part numbers into a set of universal part numbers, wherein said set of universal part numbers is associated with other numbers than the first set of proprietary part numbers, and said other numbers are associated with different suppliers or manufacturers; determining availability of one or more parts associated with said set of universal part numbers wherein said one or more parts are identified by one or more of said other numbers" as set forth in claim 1, and similarly in claim 7 and 12.
4. The closest prior art, Hinckley, describes a system for maintaining and utilizing component cross reference data in an exchange system. Further, Freeman (US 6,950,826 B1), newly cited, describe a material and supplies ordering system. However, Hinckley and Freeman do not teach or suggest the limitations cited above as being free of any prior art when read in the claims as a whole.
5. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
